

RiskCOACH® Training Catalog

RiskCOACH interactive eLearning modules incorporate the latest cognitive science to help drivers identify and change at-risk behaviors, with subject-specific formats ranging from 3-20 minutes to maximize engagement and minimize lost work time. Available in dozens of languages, RiskCOACH training modules include Q&A, best practice feedback, and knowledge checks to reinforce learning, and are delivered directly to a driver's smartphone, tablet or computer. Our latest subject-specific RiskCOACH titles, designated by the camera icon, use engaging video and animation, and feature an entertaining host who guides learners through the topic and covers best practices for becoming a safer driver.

All Vehicle Types

Attitude

Reinforces the importance of having the right attitude and focus when driving for work purposes.

Avoiding Rear-End Collisions

Help prevent rear-ending other road users and avoid being hit from behind using escape routes.

Blind Spots

Explore the importance of paying attention to blind spots around your vehicle to create a safe driving environment for you and other road users.

Distraction

Explore the dangers of multi-tasking and the importance of staying focused on driving, refraining from using electronic devices, reading maps, etc.

Driving at Night

Explore the additional dangers of driving at night, including fatigue, limited visibility, and more.

Fatigue

Explore causes of fatigue and learn how to lower your risk of being fatigued while driving for work purposes.

Hazard Recognition

Helps increase skills to spot potential hazards far in advance in order to react safely.

Risky Weather

Identifying and minimizing the risks associated with driving in such conditions.

Sharing the Road

Explore the importance of looking out for other road users and displaying considerate behavior while driving.

Speeding

Explore how speed is the biggest single contributory factor in road crashes, and the dangers of speeding for you and other road users.

Vehicle Checks

Explore the advantage of pre-trip and post-trip checks and what to look for to ensure your vehicle is in top condition.

eDriving® RiskCOACH® Training Catalog

All Vehicle Types

Off-Road

Explores driving principles to stay safe when driving on unpaved roads.

Slips, Trips, and Falls

Injuries from slips, trips, and falls can always be avoided if you take the time to properly store, lift and transport products correctly.

Zero (Low-Risk Response)

This RiskCOACH ensures that you don't let your standards slip – zero tolerance is key to safe driving.

Four-Wheeler

Advanced Safety Systems

Modern safety features available in vehicles today.

Concentration

Explore what can happen with a lack of focus and how to avoid loss of concentration.

Controlling Emotions

Highlights the impact emotions have while driving and how controlling emotions can make you a safer driver while driving for work purposes.

Decision Making

Making the right decisions on the road can allow you to stay safe and protect other road users.

Eco-Driving

Eco-Driving is a method of driving which reduces fuel consumption and greenhouse gas emissions through defensive driving.

Electric Vehicles

Electric Vehicles (EVs) — An Introduction.

Ergonomics

Explore ways to be ergonomically safe while driving for work purposes.

Harsh Braking

Drive slowly, smoothly, and steadily to prevent harsh braking.

Lane Changes, Merging, Passing

Changing lanes, merging and passing are similar maneuvers in that they all involve moving your vehicle from one lane to another. This RiskCOACH highlights the key aspects to carry out before changing lanes, merging or passing.

Parking Pitfalls

Learn how to park defensively and avoid damage while parked.

e-driving[®] RiskCOACH[®] Training Catalog

Four-Wheeler

Rural Road Safety

Hanging back, slowing down and chilling out to prioritize safety above arriving a few minutes faster can spare a huge amount of heartache on rural roads.

Self-Awareness

Managing your own level of risk on the road will eliminate the probability and likelihood of getting into a potential collision.

Severe Injury Prevention

Over 94% of road incidents are caused by driver decisions and attitudes behind the wheel. This means that 94% of road incidents could be prevented by drivers making the right decisions and having the right attitudes.

Spouse/Domestic Partner

To ensure the spouse/domestic partner understands how to safely operate the vehicle and become a defensive driver.

Wellbeing

This RiskCOACH explains why it is important to take care of your health and how making some simple changes to your lifestyle can help improve your safety on the road.

Truck/LGV

Blind Spots

Explore the importance of paying attention to blind spots around your vehicle to create a safe driving environment for you and other road users.

Distraction

Explore the dangers of multi-tasking and the importance of staying focused on driving, refraining from using electronic devices, reading maps, etc.

Eco-Driving

Eco-Driving is a method of driving which reduces fuel consumption and greenhouse gas emissions through defensive driving.

Fatigue

Explore causes of fatigue and learn how to lower your risk of being fatigued while driving for work purposes.

Bad Weather

Identifying and minimizing the risks associated with driving in such conditions.

Speeding

Explore how speed is the biggest single contributory factor in road crashes, and the dangers of speeding for you and other road users.

e-driving[®] RiskCOACH[®] Training Catalog

Truck/LGV

Cold Plate Management

Illustrates the maintenance and use of a refrigerated delivery vehicle – preloading requirements, precooling instructions, and how to deal with frost buildup.

Fifth Wheel

Explores the correct procedures for using the fifth wheel on large trucks, which can have catastrophic results if not used correctly.

Changing Lanes

Changing lanes, merging and passing are similar maneuvers in that they all involve moving your vehicle from one lane to another. This RiskCOACH highlights the key aspects to carry out before changing lanes, merging or passing.

Liftgate

Highlights how the improper use of liftgates can result in severe injury and even death when loading and unloading items, and how to safely operate a lift gate.

Lights and Tires

This RiskCOACH explores the simple checks of the vehicle's lights and tires, which is a MUST for all truck drivers.

Low-Speed Maneuvring and Backing

Highlights how to drive your vehicle safely at slower speeds and during backing maneuvers. By following the techniques outlined in this RiskCOACH, drivers will be able to reduce their chance of having one of these incidents, and also make parking areas and traffic jams safer for everyone.

Roadside Inspections

Highlights the roadside inspections program carried out by the North American Standard Inspections (NASI).

Standardized Work Methods

Establishing a good routine while working can help keep you out of danger – keep three points of contact, perform pre/post trip inspections, and plan your journey prior to departure.

Vehicle Inspections

Pre-trip and post-trip vehicle inspections pinpoint possible problems with a vehicle and gives the driver enough confidence in your vehicle to make good driving decisions. This RiskCOACH explores the routine inspections drivers need to make.

OSHA Truck (US only)

Health and safety at work.

Two/Three Wheeler

Sharing the Road

Explore the importance of looking out for other road users and displaying considerate behavior while driving.

Vehicle Checks

This RiskCOACH explores the routine inspections drivers need to make.

Fog

Driving in fog can be very dangerous. This module walks through steps to minimize risks associated with this type of inclement weather.

Two-Wheeler

Safety knowledge of the two wheeler – pre- and post-trip inspections, safety equipment, etc.

Powered Industrial Vehicle

Stability Triangle

Powered industrial vehicles are different from any other vehicle when it comes to their stability.

Pre-Shift Inspections

The importance of inspecting your PIV equipment prior to use.

Knowledge

Improve your understanding of the risks you face when operating your powered industrial vehicle.

Hazard Recognition

Describes the ability to recognise potential hazards and implement appropriate actions to deal with them accordingly / eliminate any danger.

Attitude

Your attitude determines the way you behave in the warehouse or factory and how you interact with other operators and multi skilled operatives.

General Warehouse Safety

Warehouses are busy places to work. A program of safety procedures is crucial in order to maintain a safe working environment at all times.

eDriving® RiskCOACH® Training Catalog

High-Risk Response

Act Now

To help prevent you from future collisions that may result in injuring yourself or others and encourage you to avoid committing future driving offenses.

DUI/DWI

Explains the dangers of driving while under the influence of drugs or alcohol.

Inexperienced Drivers

Young and inexperienced drivers face significant risks in the workplace. This module identifies some of the risks and focuses on best practices to minimize them.

Red Mist

Frustration and anger can take over any driving situation and cause you to make unsafe risky decisions. This RiskCOACH helps you minimize Red Mist from occurring.

Road Rage

Driving while stressed or angry can be extremely distracting and affect the way you drive. Driving with Road Rage can increase your chance of being involved in a crash.

Road Warrior

This RiskCOACH will examine why Sales and Service Professionals are in a high-risk profession, and how they can limit the dangers they face on the roads.
